

Siddhesh Dalvi

Senior Software Engineer

+91-7977413718 | siddheshdalvi54@gmail.com | Mumbai, INDIA | Experience: 8 Years 2 Months

Experienced C++ Developer with 8 years of expertise in designing and implementing high-performance, scalable systems. Proficient in STL, advanced memory management, multithreading, and low-latency system architecture. Skilled in debugging complex problems, optimizing algorithms, and enhancing application efficiency. Strong background in Agile methodologies ensures timely delivery of reliable software solutions. Committed to driving innovation and performance in dynamic development environments.

SKILLS

- C++11
- Linux
- Multithreading and Synchronization
- Network Programming
- SQL
- C++14
- STL
- Kafka
- C Program
- CI CD Pipeline
- C++17
- Data Structures And Algorithms
- IPC Programming
- System Programming

WORK EXPERIENCE

- Senior Software Engineer - Pegasus InfoCorp** Apr 2020 - Present
Working with client(Kotak Securities) on various projects like developing interactive Trading Engine along with the Broadcast Feeds received from Exchange which require immense domain knowledge to counter the difficulties faced.
- Application Developer - Merce Technologies** Jan 2018 - Apr 2020
Worked on client(National stock exchange) side project called PRISM(Parallel Risk Monitoring System).

PROJECTS

- Parallel Risk Monitoring System (Client: National Stock Exchange of India Ltd)** 6 Months
- Enhanced & Maintained the Parallel Risk Monitoring System (PRISM) to facilitate real-time risk management of trades using SPAN methodology, enhancing risk assessment accuracy.
- Developed and implemented new margin calculations including Delivery Margin, Intraday Crystallized & Uncrystallized Mark-to-Market Margin, and Options for the Commodity Segment, expanding risk coverage.
- Trading Gateway (Client: Kotak Securities Pvt Ltd)** 8 Months
- Engineered a low-latency BSE and MCX Trading Gateway to enable TCP-based order routing connectivity with exchanges.
- Developed dynamic order request modules tailored to specific order types, ensuring reliable transmission to the exchange.
- Processed and managed exchange responses, including trade confirmations, rejections, and open orders, converting them into standardized downstream packages.
- OHLC(Candle Stick) Generator (Client: Kotak Securities Pvt Ltd)** 6 Months
- Engineered a high-performance application to capture exchange multicast broadcasts, ensuring real-time market data acquisition.
- Processed raw broadcast data into multi-timeframe OHLC (Open, High, Low, Close) formats, enhancing comprehensive market analysis accuracy.
- Optimized data pipeline by integrating processed OHLC data into Apache Kafka, supporting scalable, efficient, and low-latency data consumption.
- Developed a monitoring application to track data generation and latency, implementing automated Slack alerts to reduce response time.

- Developed a market analytics application enabling clients to assess market volatility through Straddle charts, enhancing strategic trading decisions.
- Integrated real-time data ingestion from Apache Kafka to accurately retrieve Future Last Traded Price (LTP) and corresponding At-The-Money (ATM) strike prices.
- Calculated and generated Straddle metrics by combining premiums of ATM Call and Put Options (CE & PE), increasing volatility measurement accuracy.
- Created OHLC candlestick charts from calculated straddle premiums across multiple time frames to visualize market trends effectively.

EDUCATION

2016 B.Tech / B.E. | Electronics and Telecommunication Engineering
Mumbai University
Marks - 60%

2012 12th
Maharashtra, English
Marks - 65-69.9%

2010 10th
Maharashtra, English
Marks - 80-84.9%

ADDITIONAL INFORMATION

Languages: Hindi, Marathi, English
