Career Objective

Using my strong foundation in software development and passion for front-end technologies to build user-centric, scalable, and high-quality web applications. With hands-on experience in Artificial Intelligence and Machine Learning, my objective is to contribute to impact product development by integrating intelligent systems into modern UI solutions.

Technical Skills

Programming Languages: Python, C, Java, JavaScript

Frontend & Backend Technologies: HTML, CSS, React.js, FastAPI

Libraries & Frameworks: Scikit-learn, TensorFlow, Keras, LangChain

AI/ML & Data Science: Machine Learning, Deep Learning, Generative AI, Neural Networks, Model Training & Evaluation

Advanced AI Concepts: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs)

Databases: MySQL

Developer Tools: Git, GitHub, Bitbucket, VS Code, Jupyter Notebook

Experience

AI Intern - Himitsu Lab Limited (Yokohama, Japan - Remote)

03 Feb 2025 - 01 Jan 2026

- Developed and enhanced frameworks using React and AntV X6, improving visualization and interaction flows.
- Designed and implemented cognitive models to support intelligent decision-making features.
- Contributed to UI improvements, ensuring user-friendly interfaces and responsive design. Collaborating with the AI team to design, train, and evaluate machine learning and deep learning models for real-world use cases.

Artificial Intelligence & Machine Learning Intern -APSSDC

15 May 2024 - 25 Jun 2024

- Participated in a 6-week intensive internship program focused on sentiment analysis Artificial Intelligence and Machine Learning, utilizing the IBM SkillsBuild platform.
- Developed and deployed machine learning models and AI algorithms to analyze and interpret data.
- Gained hands-on experience in the development and deployment of machine learning models and AI algorithms, enhancing problem-solving and analytical skills.

Projects

Medicinal Plant Identification & AI Chat Assistant- AI Project

🐙GitHub

Key Skills: Python, Deep Learning, CNN, MobileNetV2, Flask, LangChain, Computer Vision, AI Chatbot.

- Developed an end-to-end deep learning system to identify medicinal plants from leaf images using a MobileNetV2-based CNN model with transfer learning.
- Built a Flask-based web application where users can upload leaf images and receive real-time predictions with confidence scores.
- Integrated an AI-powered chatbot using LangChain and Groq API to provide medicinal uses, preparation methods, and safety information.
- Achieved approximately 91% classification accuracy across 19 medicinal plant classes.

Plant Disease Detector- AI Project

🐙GitHub

Key Skills: Python, Artificial Intelligence, Deep Learning, HTML, CSS, CNN, Flask.

- Developed an AI-powered web application that detects plant leaf diseases using image classification with convolutional neural networks(CNN).
- The model was trained on a dataset of leaf images in multiple plant categories and disease types.
- Built a user-friendly web interface using Flask, where users can upload leaf images and receive instant disease

predictions.

Chatbot- AI Project

Key Skills: Python, Artificial Intelligence, Machine Learning, API, HTML, CSS, JavaScript.

- Created a terminal chatbot using Python and OpenAI GPT-3.5 API. Implemented user input handling, API communication, and secure API key management using environment variables.
- Technologies used: Bolt IoT AI.

RAG-Based SQL Query Generator- AI Project

Key Skills: Python, RAG, LLM, SQL, NLP, Vector Database, API Integration.

- Developed a Retrieval-Augmented Generation (RAG) system that converts natural language queries into SQL queries.
- Integrated Large Language Models (LLMs) with a vector database to retrieve schema/context and generate accurate SQL queries.
- Enabled users to input plain English questions and receive executable SQL queries for database interaction.
- Improved query accuracy by combining contextual retrieval with prompt engineering techniques.

Certifications

- Certification in introduction to Artificial Intelligence : from Infosys spring board
- Certification in Python for Data Science : IBM
- Machine learning to Generative AI certificate: from Skills Build
- Certificate of Deep Learning Fundamentals : Cognitive Classes.
- Generative AI Certificate : Internshala

Education

Aditya University | CGPA: 8.66 / 10

2022-Present

- B.Tech - CSE - Artificial Intelligence and Machine Learning

Srujana Model Junior college | Percentage: 93 / 100

2020-2022

- Intermediate | BIEAP | MPC
